

# GAC Brazil Shipping Services

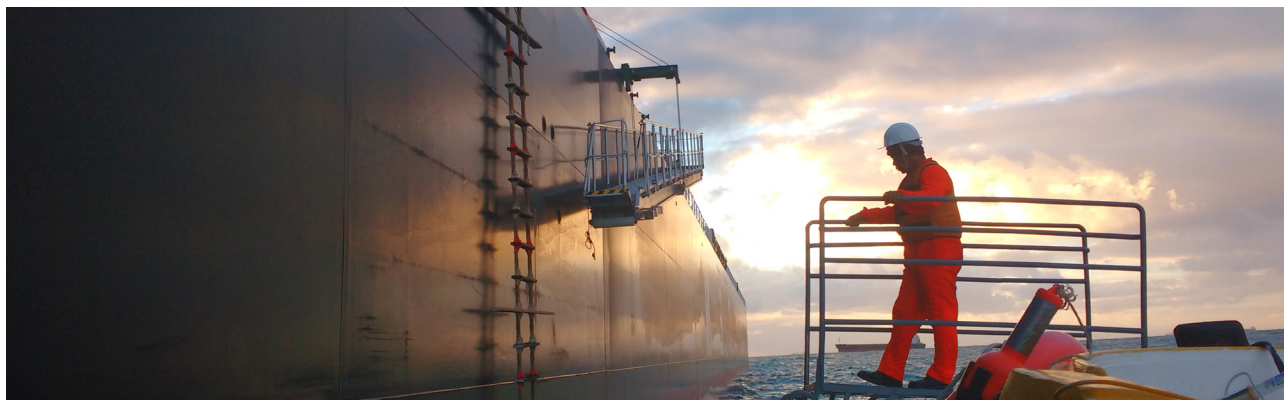

**Delivering integrated services throughout  
South America**

GAC Brazil is the South American arm of GAC Group, a global leader in ship agency services with more than 300 offices in over 50 countries. You can count on our local expertise and the muscle of our global network - a winning combination that moves your business globally.

**Delivering your strategy.**

# Skill, local knowledge and network to keep you moving

## Comprehensive coverage

With offices across the country, GAC Brazil offers specialised shipping services including ship agency, husbandry, supply services, crew transfers, bunker fuels coordination, medical assistance and more.

## Crude oil expertise

Serving the major oil companies, we provide integrated shipping agency services combined with cargo export clearance expertise. From the nomination through the cargo export process, GAC Brazil supports the entire oil lifting logistics industry.

## Oil derivatives expert

Tanker ships require differentiated expertise. GAC Brazil is a step forward, looking after the interests of charterers, trading houses, receivers or any other client to ensure special care on cargo documentation and other

aspects of each port call. We employ highly skilled and trained professionals, resulting in high productivity and cost savings with quick vessel turnaround.

## Your strategic partner

GAC Brazil serves technical managers, ship owners and offshore companies that demand first-class husbandry services while calling at any Brazilian port. With our in-house dedicated crew and spare parts departments, we have the cost-effective option for your husbandry needs, handling thousands of crew transfers and hundreds of spares delivered each year.

## Up-to-date information

We provide current and precise data to vessel operators and charterers. We will keep you informed through the planning and fixture stages.

- Highest quality, safety and compliance standards
- Strict adherence to GAC Group Health, Safety, Security and Environment (HSSE) policies coupled with management systems and vetting processes
