

## COVID-19 UPDATE

Covid-19 represents the greatest threat to public health for a generation. Responding to this crisis has presented challenges for businesses throughout the logistics industry and the Port of Felixstowe is taking action aimed at helping to protect everyone at the port during the Covid-19 outbreak

### Hand Scanners

The use of hand scanners is necessary to comply with international security regulations. The Government has advised that this requirement **will not** be relaxed during the current crisis

### Hand sanitiser/ wipes

Drivers should be supplied with hand sanitiser and anti-viral wipes by their employers. The PHE has confirmed that the provision of these products is the employer's responsibility

### Screens and Scanners

The Port of Felixstowe has provided the means to allow drivers to disinfect screens and scanners before use. More information provided below

### IMPORTANT INFORMATION ON PORT PROCEDURES

- **Agreed with Public Health England**
- **The disinfectant is Sodium Hypochlorite, diluted to the recommended level to combat Covid-19**
- **Always use paper towels provided; the solution should not be applied directly to hands**
- **If it does come into contact with hands it might sting but will not cause any harm**
- **If the disinfectant comes into contact with hands or eyes it should be washed off immediately**

**PLEASE FOLLOW ALL OTHER GOVERNMENT ADVICE ON HAND WASHING AND SOCIAL DISTANCING**

**THANK YOU**
