To all Shippers, Agents & Customers

28 Feb 2025

Subject: RAK Ports Cargo Handling – Fuel Surcharge (April 2025)

As advised through previous correspondence, the Fuel Surcharge will be reviewed on a monthly basis. The **April 2025** surcharge is based on the published fuel price of the month of **March 2025**.

(2.77 AED Per Litre/Diesel).

Therefore, be advised that with the effect of **1 April 2025**, until advised otherwise, the following surcharge will be invoiced for each Metric Ton / Freight Ton loaded or discharged at RAK Ports:

- 0.12 AED Per Metric Ton / Freight Ton

The formula used to generate this surcharge rate calculates the average fuel purchase price per litre vs. the average fuel consumed per ton loaded or discharged, against the published UAE average monthly fuel purchase price. The latter is routinely published on or after the 28th day of each month.

The Port Management regrets having to pass on these costs and would like to thank its customers and agents for their understanding in this respect.

Justin Wardle

Port Manager
